This play centre contains three platforms, two slides and several climbing elements. A small ladder leads to the lowest platform where a slide leads down and a balance bridge with moving steps leads higher. On that platform a crossroad awaits: kids can slide down a fireman's pole or head onwards via a net bridge with handrails, to dash down from the other platform via the second slide. The higher platform can also be reached via a rock climbing slope. A climbing wall with holes offers an additional challenge for developing gross motor skills. A Tic-Tac-Toe game, a captain's helm and binoculars add an extra layer of fun. Hidden beneath the platform is a play corner with a bench, which can be fitted with kitchen or car dashboard elements. The side panels of the play centre can be switched for various activity walls or thematic printed panels.
