The product's painted profile posts made of laminated timber are concreted into the ground using hot-galvanized metal tubular fittings.

This engaging and versatile climbing and play centre provides a selection of diverse elements for many different activities. The five platforms can be accessed via ladders or climbing walls with holes. A net bridge, a crawl tunnel and a sloping bridge with handrails connect the platforms. A slide and a fireman's pole offer excellent sliding opportunities. An adjoined climbing complex, comprised of a net wall, climbing ropes, monkey bars with handles, a shifting balancing beam, and a vertical ladder, helps develop climbing and dexterity skills. For role playing, the centre is equipped with a Tic-Tac-Toe game and a fun play corner with a bench, which can be fitted with either kitchen or car dashboard elements. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
