The product needs a safety surface

This fun and versatile play centre with four platforms and several additional elements is every kids dream. The centre can be accessed via a ramp with rungs, a ladder or an arched path with a rope support. A suspension bridge with moving steps, a net bridge and a net tunnel that connect the platforms help practice balance and coordination. The centre offers three climbing walls of varying difficulty. A slide or a fireman's pole make sliding down fun. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
