The product needs a safety surface

This play centre with its five platforms, two slides and several additional elements is well suited for diverse activities. Stairs with handrails lead to the lower platform, which is fitted with a slide. Platform side panels contain a clock with moveable hands and a turning wheel. Various ladders, rock climbing walls and climbing nets lead to the higher platforms. A slide and a fireman's pole offer a way down from the highest platforms. An adjoined climbing complex with net walls, climbing ropes and a rock climbing wall allows the kids to put their dexterity and climbing skills to the test. Two binoculars and a play corner with a bench, which can be fitted with either kitchen or car dashboard elements add an extra layer of fun. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
