The product needs a safety surface

A play centre with four platforms, a tunnel and two slides. Stairs with handrails lead to the lower platform, which is adorned with an engaging activity panel. A crawl tunnel leads to the next platform, which is equipped with a rock climbing wall. An arched ladder leads higher, to the platform with a slanted roof, where a slide leads down again. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
