The product needs a safety surface

A play centre with three platforms of different heights, two slides, and climbing walls. Stairs with handrails and a climbing net slope lead to the centre. A net bridge with handrails leads to the highest platform. Two net walls, a ladder and a climbing wall with holes offer a chance to practice dexterity and climbing skills. Two slides provide a way down. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
