The product needs a safety surface

A play centre with a platform, a slide and various climbing elements. Stairs with handrails lead up to the centre. The integrated climbing complex, which houses several net walls, a climbing wall with holes and climbing ropes, allows practicing both climbing skills and dexterity. Binoculars, a captain's helm and a play corner with car dashboard elements satisfy role playing needs. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
